Kuffner*

ATTENDANCE:

G. Lund VNC, T. Haney Contractor, M. Scherr OES, R. Creel LAC,
M. Harris CDF, G. Dinger LFD.

1. ICS Training Course development progress report by Scherr and Harris.

Medical Unit - The Task Force needs to improve procedures and responsibilities related to a "Major Medical Emergency".

Ground Support Unit - The logic for placing the responsibility of supporting and reporting status of "Out of Service" resources with the Ground Support Unit needs to be evaluated and a change considered.

2. * Reviewed the justification for recommending vests as a method of identifying key personnel filling ICS positions on incidents. The decision was made to recommend to the Operations Team that vests be used.
3. Discussed the concern of OES that the present Strike Team identification system was not compatible with OES operations. There is a concern that an agency mix of engines formed into a Strike Team with the identifier of the agency who provided the leader may create some hard feelings due to lack of agency recognition. It was agreed that the system would be discussed with the Operations Team at their next meeting in hopes of resolving the issue.
4. Haney passed out the following to be reviewed and comments back by April 9-10, Task Force meeting.
 - . ICS Positional Checklist
 - . ICS Form 202 "Incident Objectives"
 - . ICS Form 220 "Air Ops Summary"
5. The pre-fire season FIRESCOPE update letter was reviewed and modified. It will be presented to the Ops Team April 2-3, for approval.
6. Approved the documentation from the Program Office identifying the distribution of additional 38 synthesized radios to be purchased. (See attachment with adjustments made by Operations Team April 3rd).
7. Meeting Schedule

Task Force

April 9-10	VNC, Camarillo Station 54
April 14-15	OCC, Riverside
April 23-24	SBC, Department Headquarters
