I. Multi-Casualty Overview

The Multi-Casualty ICS Module and Lesson Plans were discussed at length. There is a keen interest that exists statewide for this training and although the package has not been approved through the Decision Process, there are several courses/classes on Multi-Casualty being presented or scheduled, one being in ORC.

Action:

1. Ken Brown, SFM, will notify the Fire Services statewide of the status of Multi-Casualty ICS and will advise them that as soon as the packages are completed and approved that the SFM office will coordinate the deliver of the training as outlined in the Decision Process.
2. Mike Colgan will meet with ORC T.O. Association and represent the Task Force for the purpose of correcting the misconceptions on their scheduled class.
