Many reservations regarding the content of this document was expressed by the Task Force members as well as duly noting that the document has not been officially presented to the Task Force for review. Due to the constraints expressed by the USFS for this document it is being forwarded to the OPS Team for their direction.

Nothing new as to budget appropriations. Still operating in the close down mode at this time. Will continue with projects as scheduled.

8. M. Barrows talked about the "order processing" developed by the Program Office. That program has been suspended temporarily by that office. The Manual Order Processing Form needs to be developed by the Task Force and be ready for review and implementation.
