Absent: SBC

1. Marty Barrows discussed some problems with the Field OPS Guide. Monesmith will give appropriate changes to SSM.
2. Roger presented OPS Team notes for review. Some modifications were recommended.
3. Resource Designation System: Further discussion of this item continued from last meeting. Further evaluation of the OES Proposed System was followed by a preliminary vote to ascertain if the system proposed by OES would meet the identified needs of all concerned. 6 Agencies voted to the affirmative. CDF Abstained, requesting additional time for agency review. Dick Barrows will draft a more complete document detailing the proposed system and provide copies for distribution. Task Force directed Chairman Perry to give a preliminary report to the OES Team. All members agreed to not take further action until CDF can respond, approximately six weeks.
4. Gary Ross presented a letter from CDF detailing some of the impacts that a change in Resource Designation Systems at this time would have. Task Force directed Chairman Perry to forward this document to the OPS Team for their consideration prior to any decision. See attached:
